# Zimbra+

Email, contacts, calendar, tasks + documents, instant messaging and more.

Truly designed to work together

Increase Productivity | Save Money | Collaborate | Sell More | Secure | UK Based

# Zimbra+

Zimbra+ offers all of the capabilities you would expect from an Email and Collaboration system designed for and used by over 100m business people around the world + the ability to edit and manage your documents in the cloud, communicate via instant messaging and more.

Email

Calendar

Tasks

Contacts

Documents

## Hyper-Compatible.

Zimbra+ boasts some of the best compatibility in the business meaning you can edit a Microsoft Office document with Zimbra+ and the formatting will remain the same.

## Go Mobile.

Support for most major smartphones means your office really is anywhere you are.

## Priority Inbox.

Receive the important stuff done with Priority Inbox. Priority Inbox intelligently filters out the unimportant emails ensuring you receive only what you need to do right now. And don't worry, your other emails are there for you to view when you choose.

## Examples of how Zimbra+ can help

### Shared address list.

Keep your customers and suppliers in a single address list and easily share this with everyone in your organisation.

### Shared company document store.

Store important company documents – quotes, proposals, marketing materials in folders and make these available for colleagues to download, and even edit if you choose.

### Stay in sync – wherever you are.

Update a contact in Outlook and it will instantly update on your iPhone. Send an email on any device and when you look in your sent items on any other, that email will be there. Create a document on your desktop and it will be available for you to edit on your mobile.

A 30-day trial of Zimbra+ is also available.

# Zimbra+ Features

## Intuitive Email.

Innovative features such as Conversation View, Priority Inbox, Advanced Search, Filters, Tags and more help put you in charge of your Inbox and take control of the daily email deluge.

## Calendar.

With Zimbra Calendar you can create calendar invites, track responses & manage resources such as meeting rooms and projectors without leaving your email programme.

## Document Storage.

Store your documents in your Zimbra Briefcase and you'll always have access to them. You can even share them with colleagues too.

## Contacts. Managed.

Keep your contacts synced across your devices preventing duplications and ensuring you always have the correct, up-to-date contact information.

## Documents. Online. Anywhere.

Create, edit and collaborate on documents stored in the briefcase with colleagues. Office Anywhere means you can edit from your browser, desktop, mobile or tablet.

## Enterprise Chat.

Providing you a secure and powerful chat platform to use company wide using your same Zimbra login details.

## Go Mobile.

Whether you use an iPhone, iPad, Android or Blackberry, it's supported. In fact even windows mobile is too. All of your data, always at your fingertips.

## All completely Integrated.

Open your Word, Excel and PowerPoint documents from the briefcase and edit them without leaving your email programme.

## Increasing your productivity.

- Everything is integrated and at your finger-tips.
- Innovative features which save you time.
- Everything always in sync.
- Work anywhere, anytime.

# Zimbra+ Features

## Collaborate.

Easily share any email or documents folder, calendar, address book, documents or task list with colleagues or customers.

## Archiving.

Archive your emails and keep them for up to 10 years. Meaning you never have to delete anything e.g. you know you'll have access to that contract you signed some years ago.

## Saving you money.

- No server hardware or software to buy.
- Integrated features mean you no longer need to pay for separate equipment or licences.
- Increased efficiency and productivity.

## Compliance Features.

Maintain legal compliance and ensure full control with:

1. Legal search + retention
2. Company wide disclaimer
3. Email encryption

## Trash Recovery.

Don't worry about accidentally deleting an email even if you've emptied the trash. You can easily recover it yourself for up to 90 days before it gets permanently deleted

## To-Dos. Done.

Your tasks are really important and with Zimbra you can manage them across all of your devices, create tasks from an email and receive reminders when they need to be done.

## Instant Search

Even with the largest mailboxes. Save common searches as virtual folders and tag your emails to virtually file them making it really easy to find in the future.

## Guaranteed Delivery

With 100% Guaranteed email delivery we have an industry leading delivery rate you can rely on backed by over 11 years experience managing email.

## Spam and Virus filtering

Using industry leading filtering techniques, spam and viruses are removed with almost zero false positives. Meaning you get the email you want without the need to sift through all of that spam.

# Our Promise

## Expert Support.

When it comes to mission critical services such as email you need to be dealing with experts. We are the experts.

When you call or email us you talk directly to email engineers. You'll get any issue solved quickly, accurately and usually first time.

## UK based. Industrial Grade Systems and Security.

We host in world class UK Tier III, ISO 27001 certified data centers with enterprise specification equipment. And with our 100% guaranteed delivery SLA you can be assured you'll always receive your email.

We're obsessive about data security. Real time replication and backups mean that for every 1GB of email we actually store 8GB.

## Sell More

With up to date customer information at your finger-tips it's easier than ever to regularly keep in touch with your customers. Plus 100% delivery guaranteed means you'll never miss an important customer enquiry. And a decrease in spam will increase your productivity freeing you up to focus on what you do best.

## Trouble-free Migration.

Migrating your email to us will be a breeze - we'll ensure everything goes to plan.

And with zero downtime guaranteed and the ability to run in parallel to test you'll always know where you are and how everything works before your full migration.
