# BeeZim

- Since 2012
- Email and collaboration
- Integration, development, maintenance, training
- 100 customers, 4M+ mailboxes

redhat.

**GOLD PARTNER**

**VALUE ADDED  
RESELLER**

**CERTIFIED PARTNER**

**TRAINING**

# What we wanted to fix with ceph ?

redhat.

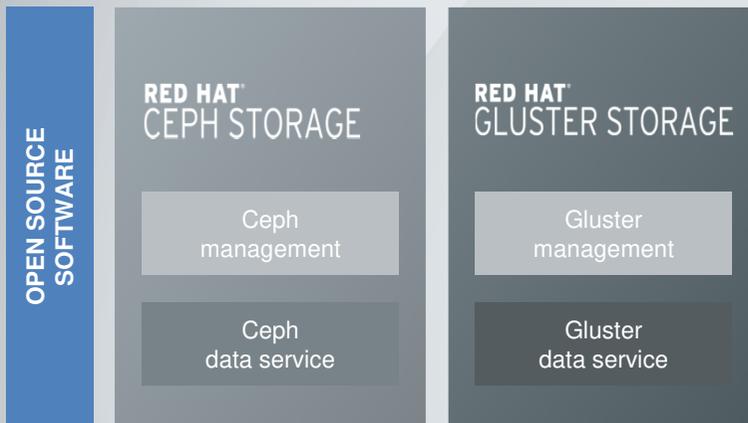

- Storage Cost and regular increase
- Backups time and restoration
- Large VM backups (Zimbra Stores)
- Improve user experience

# Introduction à RedHat Ceph Storage

# THE RED HAT STORAGE PORTFOLIO

Share-nothing, scale-out architecture provides durability and adapts to changing demands

Self-managing and self-healing features reduce operational overhead

Standards-based interfaces and full APIs ease integration with applications and systems

Supported by the experts at Red Hat

**Standard x86 servers**

# FOCUSED SET OF USE CASES

**RICH MEDIA**

**BACKUP / ARCHIVE**

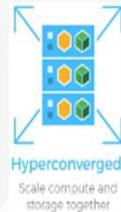

**NAS WORKLOADS**

**SYNC AND SHARE  
AND  
COLLABORATION**

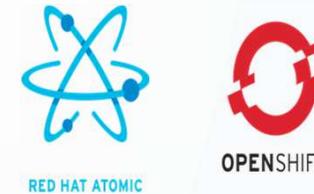

**Vmware / Microsoft**

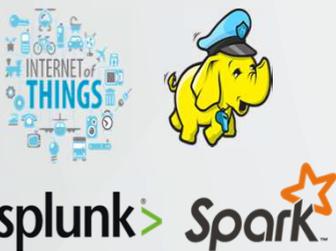

**Hyperconverged**  
Scale compute and storage together

**STORAGE FLASH /  
SGBD**

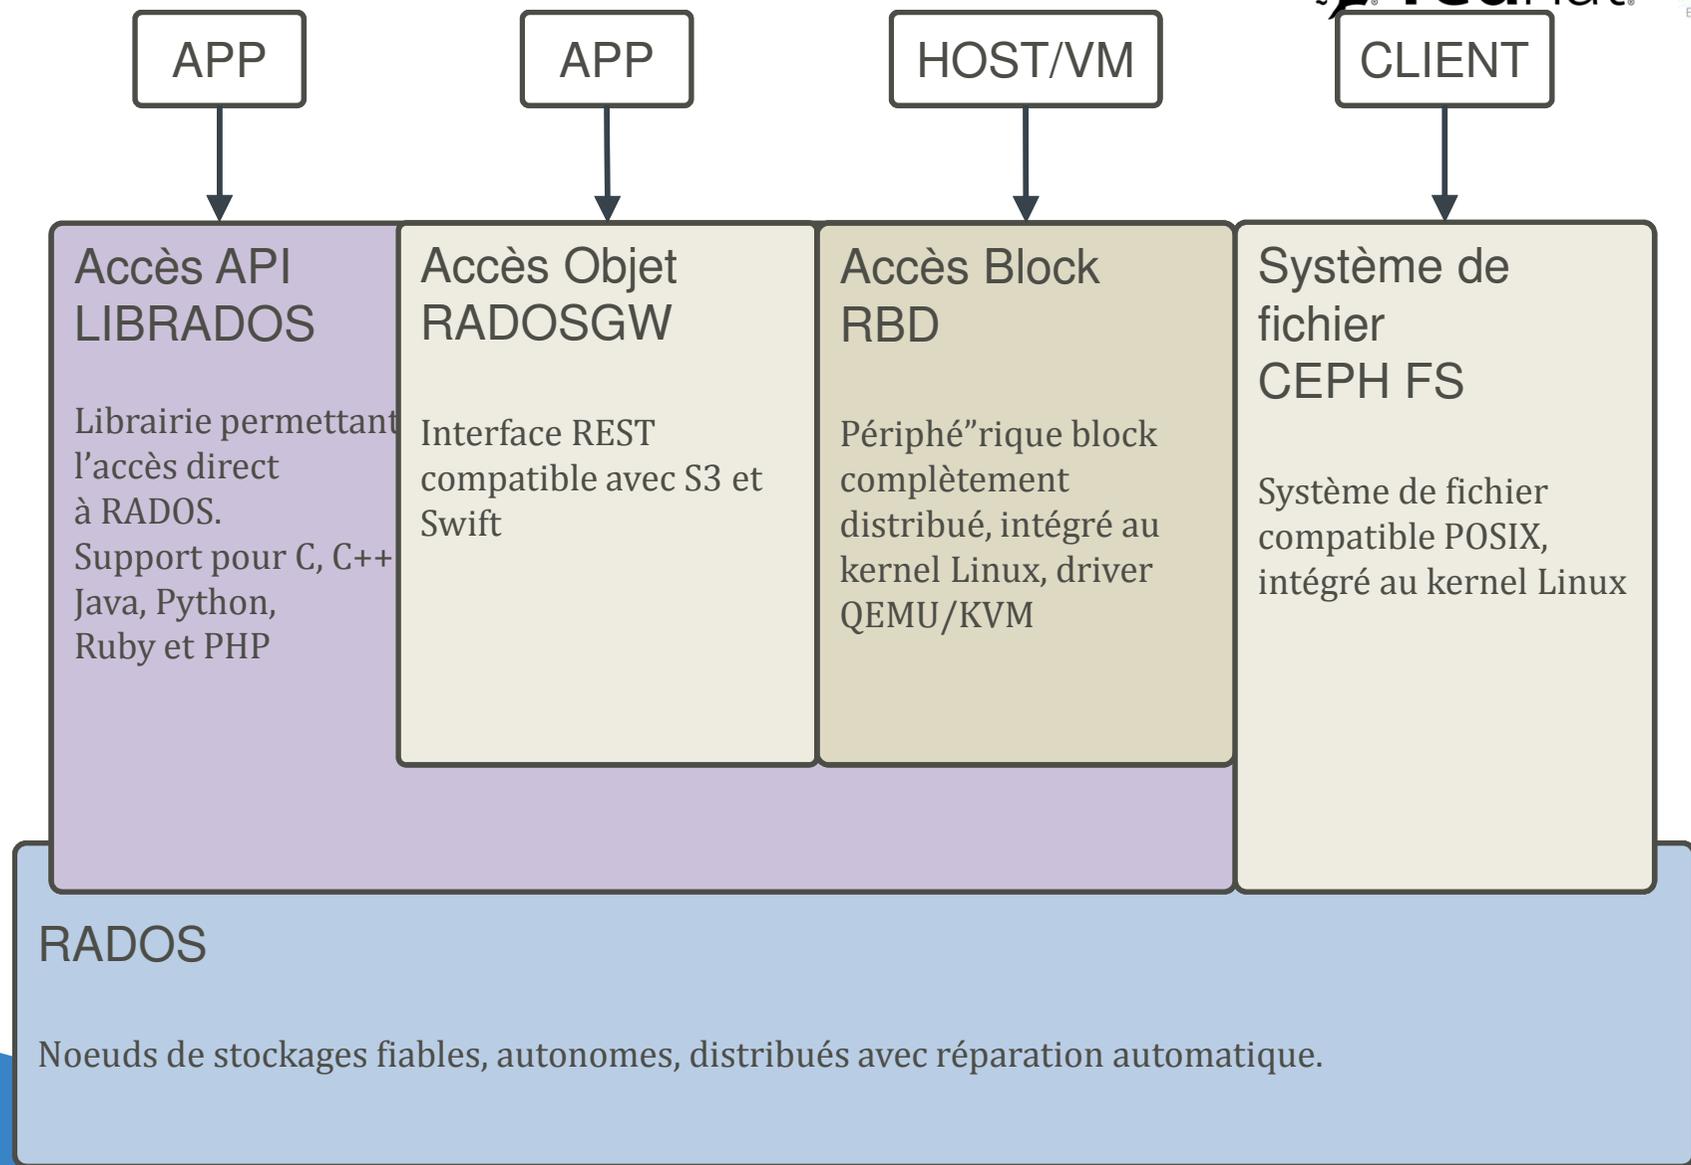

**CONTAINERS**

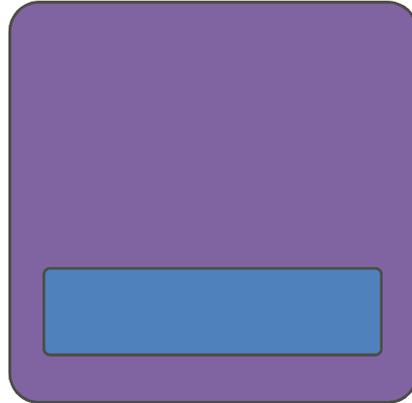

**ANALYTICS**

**CLOUD / VIRTUAL**

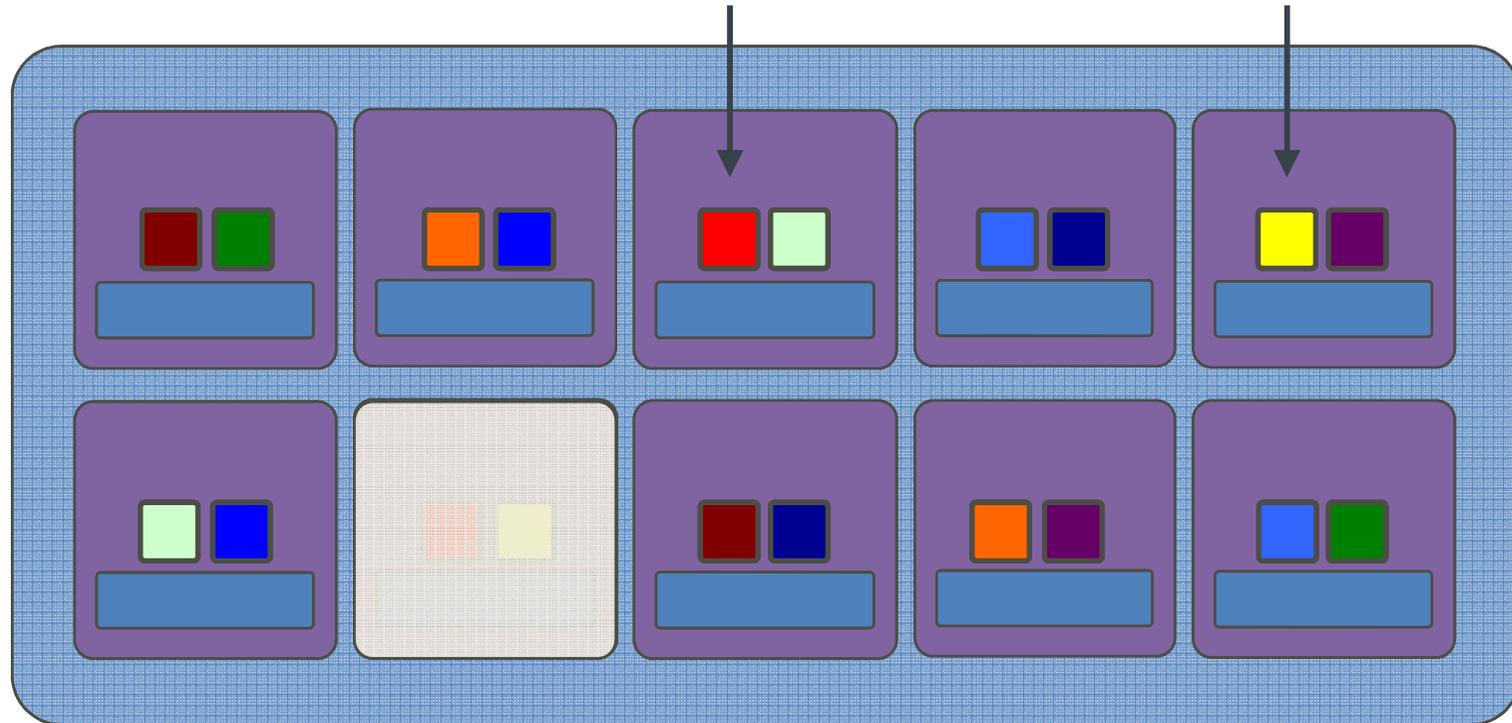

### OSDs:

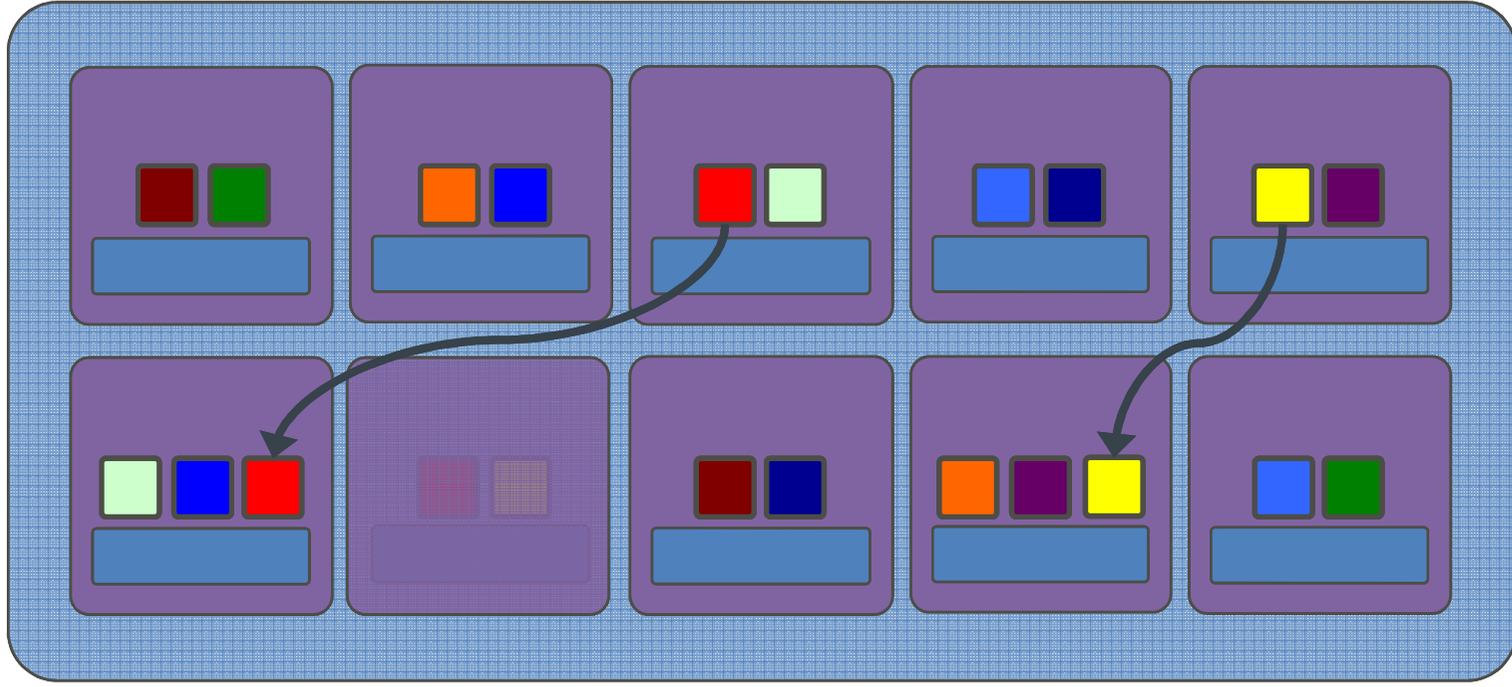

- 1 à 10000 dans un cluster
- Un par disque
- Fournissent les objets aux clients
- Répliquent et réparent les données intelligemment

### Monitors:

- Contient l'état et la liste des membres du cluster
- Consensus pour la prise de décision distribuée
- Petit nombre
- Ne fournissent pas les données aux clients

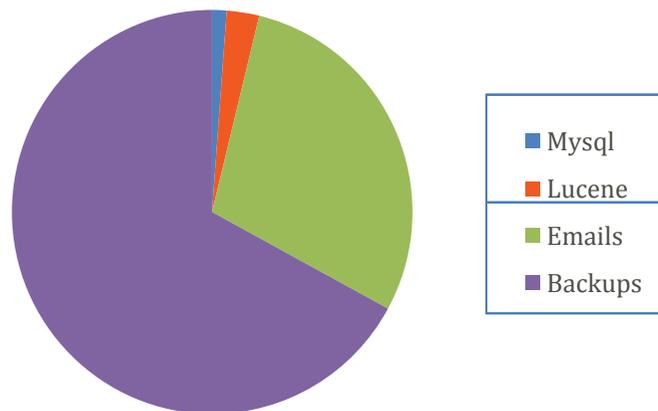

# Zimbra et RedHat Ceph Storage

# Where are my data ?

Zimbra : 4 type of data

- MariaDB ( $\approx 4\%$ )
- Lucene ( $\approx 9\%$ )
- Blobs (100%)
- Backups ( $\approx 230\%$ ) for 15 days

Disque classique

# Quick Win to object storage

redhat.

- Reduce storage Size
- Improve disaster recovery and reliability
- Divide backup time by 25
- Divide restore time by 20
- Deduplication

# Quick Win to object storage

redhat.

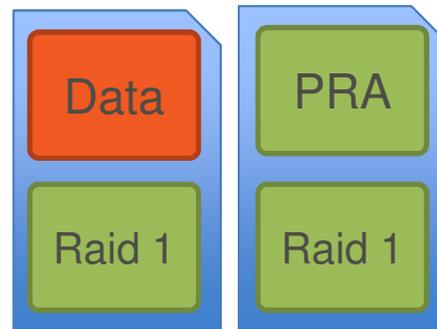

- Deduplication across servers
- Reduce VM size
- Increase # mailboxes/server
- Easy rolling upgrade
- Easy storage management
- More performance than other object storage connectors with // Ios
- Idempotent IO

# Sample

Classique

Avec Ceph

# Simple installation

From Zimbra :

- Add a new server
- Configure the Ceph connector
- Move Mailboxes

redhat.

# Démo

# Université de Lorraine

redhat.

- Migration from april to june without downtime
- 200.000 messages and 32 Go each day
- Double quote for 91000 mailboxes
- 60% deduplication
- Backup 100.000 mailboxes each night
- Instant restore
- Increased backup retention (15 to 60 days)
- Update without downtime
